Tax seminar around the India Budget 2020

With a vision to attract foreign investments in India and generate a healthy investment environment, the Government of India has recently announced various measures and stimulus packages. Some of the significant measures including CIT rate cut to 15% / 25%, simplifying audit process including moving to e-audits and liberalizing foreign exchange control rules. In parallel there is unprecedented investment on the infrastructure side including roads / railways, clean energy, electric vehicles etc.

As we run into the announcement of Indian Union Budget 2020 on 1 Feb 2020, we expect additional tax reforms and tax policy developments to incentivize foreign investments and simplify the current tax framework.

With this backdrop, we invite you to discuss the new opportunities emanating out of the recent tax and regulatory reforms and the expected Budget 2020 announcements. Amit Jain (Leader Global Desk EMEIA and India desk) and Ronak Sethi (India desk) from London will be present to share their perspective.

In case you wish to have a separate one to one discussion then please do let us know as Amit / Ronak will be available pre and post the session.
